

1.

NEW PRODUCT

Product Features

1. The product utilizes optimized SGT technology, featuring low on-resistance and excellent switching performance.
2. It is available in TOLL package, making it suitable for high power applications such as BMS.
3. According to various working states of industrial control applications, the EAS capability of MOS products is optimized to improve the reliability of products.

Please refer to the official website for more details

产品介绍

YangJie technology recently launched a series of N100V MOSFET products for industrial, products using specially optimized SGT technology, with low $R_{ds(on)}$ and Q_g , significantly reducing forward voltage drop and switching losses, while improving the MOSFET's ability to resist impulse current.

Typical Applications

New Product Launch
